

SPILLCON

20 – 24 May 2019
Perth, Australia

SPEAKER

Andy McCallum

Andrew McCallum is a Senior Technical Officer in Operational Planning for the Australian Marine Oil Spill Centre. Since 2012 Andrew has been part of the team that provides response planning, preparedness, and operational support for major marine pollution events in and around Australia, including the recent Solomon Trader response in the Solomon Islands.

Prior to joining AMOSC Andrew's background as a Chemical Engineer provided the opportunity to work in a technical capacity on O&G exploration/production and geothermal drilling operations from Scotland to New Zealand, as well as within Australian refineries and the water treatment sector.
