

SPILLCON

20 – 24 May 2019
Perth, Australia

SPEAKER

Jason Antenucci

Jason has a PhD in Fluid Mechanics and more than 18 years of experience in coastal and metocean engineering. He has particular experience in modelling of physical processes and water quality, including oil spills, and has published more than 45 peer-reviewed journal papers attracting more than 2500 citations. He has been developing operational modelling systems for more than 15 years, involving real-time data integration with models to provide operational responses to key stakeholders. For the past 3 years he has been involved in several projects with AMSA, developing models to reduce the risk of vessels running aground, and therefore limiting associated risks including oil spill.
